THE

AMERICAN

JOURNAL OF SCIENCE.

EDITORS

JAMES D. AND EDWARD S. DANA.

ASSOCIATE EDITORS

PROFESSORS JOSIAH P. COOKE, GEORGE L. GOODALE AND JOHN TROWBRIDGE, OF CAMBRIDGE.

PROFESSORS H. A. NEWTON AND A. E. VERRILL, OF NEW HAVEN,

PROFESSOR GEORGE F. BARKER, OF PHILADELPHIA.

THIRD SERIES.

VOL. XXXVII.—[WHOLE NUMBER, CXXXVII.]

Nos. 217—222.

JANUARY TO JUNE, 1889.

WITH XIV PLATES.

PUBLIC LIBRARY DETROIT, MICH. JAN 15

NEW HAVEN, CONN.: J. D. & E. S. DANA.

1889.

Tuttle, Morehouse & Taylor, Printers,
New Haven, Conn.

CONTENTS OF VOLUME XXXVII.

Number 217.

Page.

ART. I.—The History of a Doctrine; Address by S. P. LANGLEY 1

II.—Description of the new mineral, Beryllonite; by EDWARD S. DANA and HORACE L. WELLS. With Plate I 23

III.—The Iron Ores of the Penokee Gogebic Series of Michigan and Wisconsin; by C. R. VAN HISE. With Plate II 32

IV.—Recent Observations of MR. FRANK S. DODGE, of the Hawaiian Government Survey, on Halema'uma'u and its debris-cone; by JAMES D. DANA 48

V.—Notes on Mauna Loa in July, 1888 51

VI.—A Quartz-Keratophyre from Pigeon Point and Irving's Augite-Syenites; by W. S. BAYLEY 54

VII.—On the occurrence of Hanksite in California; by HENRY G. HANKS 63

VIII.—Sperrylite, a new Mineral; by HORACE L. WELLS 67

IX.—On the Crystalline form of Sperrylite; by S. L. PENFIELD 71

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics—On the Vapor-density of the Chlorides of Indium, Gallium, Iron and Chromium; and on two new Chlorides of Indium NILSON and PETTERSSON: On the Vapor-density of Ferric chloride, FRIEDEL and CRAFTS, 73.—On the Vapor-density of Gallium chloride, FRIEDEL and CRAFTS: On the Molecular Mass of Sulphur, Phosphorus, Bromine and Iodine in Solution, PATERNO and NASINI: On the Atomic Mass of Osmium, SEUBERT, 74.—A Class Book of Elementary Chemistry, W. W. FISHER: Examples in Physics, D. E. JONES: Oxygen lines in the Solar Spectrum, M. JANSSEN, 75.—Effect of staining upon dry plates, KUNDT: Electrical currents produced by light, STOLETOW, 76.

Geology and Natural History—Cambrian of Bristol County, in Eastern Massachusetts, N. S. SHALER, 76.—Silicified wood of Arizona, F. H. KNOWLTON: Dahllite, a new mineral, BRÖGGER and BÄCKSTRÖM: Das Protoplasma als Fermentorganismus, ALBERT WIGAND, 77.—"Ringed" Trees, W. L. GOODWIN: A Provisional Host, an Index of the Fungi of the United States, W. G. FARLOW and A. B. SEYMOUR, 79.—Bibliotheca Zoologica II, bearbeitet von O. TASCHENBERG, 80.

Number 218.

Page.

ART.—X.—Points in the Geological History of the islands Maui and Oahu; by JAMES D. DANA. With Plates III and IV. 81

XI.—Experiment bearing upon the Question of the Direction and Velocity of the Electric Current; by EDWARD L. NICHOLS and WILLIAM S. FRANKLIN 103

XII.—Occurrence of Monazite as an accessory Element in Rocks; by ORVILLE A. DERBY. 109

XIII.—Use of Steam in Spectrum Analysis; by JOHN TROWBRIDGE and W. C. SABINE 114

XIV.—New Personal Equation Machine; by A G. WINTERHALTER 116

XV.—Subsidence of Fine Solid Particles in Liquids; by CARL BARUS 122

XVI.—Comparison of the Electric Theory of Light and Sir William Thomson's Theory of a Quasi-labile Ether; by J. WILLARD GIBBS 129

XVII.—Geology of Fernando de Noronha. Part I; by JOHN C. BRANNER. With a map, Plate V 145

XVIII.—Appendix: Restoration of *Brontops robustus*, from the Miocene of America; by O. C. MARSH. With Plate VI 163

SCIENTIFIC INTELLIGENCE.

Miscellaneous Intelligence—American Geological Society: Mineral Resources of the United States, DAY: Index der Krystallformen der Mineralien, GOLDSCHMIDT, 162.

Number 219.

Page.

ART. XIX.—Some Determinations of the Energy of the Light from Incandescent Lamps; by ERNEST MERRITT. 167

XX.—Geology of Fernando de Noronha. Part II; Petrography; by GEORGE H. WILLIAMS 178

XXI.—Ophiolite of Thurman, Warren Co., N. Y., with remarks on the Eozoon Canadense; by GEO. P. MERRILL 189

XXII.—Origin of the deep troughs of the Oceanic depression: Are any of Volcanic origin? by JAMES D. DANA, with a bathymetric map, Plate VII 192

XXIII.—Description of a problematic organism from the Devonian at the Falls of the Ohio; by F. H. KNOWLTON 202

XXIV.—Some curiously developed pyrite crystals from French Creek, Delaware Co., Pa.; by S. L. PENFIELD ... 209

XXV.—Crystallized Bertrandite from Stoneham, Me., and Mt. Antero, Colorado; by S. L. PENFIELD 213

XXVI.—Mineralogical Notes; by J. S. DILLER 216

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics.—Determination of molecular mass by means of vapor pressure, RAOULT, 221.—Method of avoiding "Bumping" in Distillation, MARKOWNIKOFF: Thiophosphoryl fluoride, THORPE and RODGER, 222.—Relation between the Absorption-spectra of Organic Compounds and their Chemical Composition, KRÜSS, 223.—Absorption-Spectrum of Oxygen, LIVEING and DEWAR: Spectrum of Oxygen at high altitudes, 224.—Compressibility of Oxygen, Nitrogen and Hydrogen, AMAGAT: Heat of Vaporization of Volatile Liquids, CHAPPUIS: Combination of Oxygen and Nitrogen in Gaseous Explosions, VEITH, 225.—Dissipation of Fog by Electricity, SORET: Magnetization of iron and other magnetic metals, EWING and LOW: Figures produced by electric action on photographic plates, BROWN, 226.—Spectrum of Cyanogen and Carbon, VOGEL: Determination of the focal length of a lens for different colors, HASSELBERG, Electrodynamic Waves, HERTZ, 227.—Resistance of electrolytes, THOMSON, 228.—Orthochromatic Photography, H. W. VOGEL: Voltaic Balance, 229.

Geology and Mineralogy.—Fossil Plants of the Coal-measures of Rhode Island, L. LESQUEREUX, 229.—History of Volcanic Action during the Tertiary Period in the British Isles, A. GEIKIE, 230.—Geological and Natural History Survey of Minnesota, N. H. WINCHELL and W. UPHAM, 231.—Geological Survey of Kentucky, J. R. PROCTER: Geology of New Jersey, G. H. COOK, 232.—Woodham Artesian Well, E. Lewis, Jr.: Bowlder-Glaciation, H. MILLER, 233.—Archæocyathus of Billings, G. J. HINDE: Analyses of waters of the Yellowstone National Park, F. A. GOOCH and J. E. WHITFIELD, 234.—Elemente der Paläontologie, C. STEINMANN and L. DÖDERLEIN: Die Stämme der Thierreichs, NEUMAYR: Fossil Cockroaches, S. H. SCUDDER: Visual area in the Trilobite, Phacops rana, J. M. CLARKE: Mineralogical Notes, E. F. AYRES, 235.—Barite from Aspen, Colorado, J. F. KEMP, 236.—Serpentine of Montville, N. J., G. P. MERRILL: Slipping planes and lamellar twinning in Galena, W. CROSS: New York Minerals and their localities, F. L. NASON, 237.

Botany and Zoology.—Certain relations of the cell-wall, KOHL: Chemical nature of assimilation, T. BOKORNY, 237.—Improvement of the "races" of the Sugar Beet, C. VIOLLETTE and F. DESPREZ: Primordial leaves of Abietineæ, DAGUILLON, 238.—Notes on Cestoid Entozoa of Marine Fishes, E. LINTON, 239.

Miscellaneous Scientific Intelligence.—Photographic Map of the Normal Solar Spectrum, 240.—Temparature record at Hilo, Hawaii; A short Account of the History of Mathematics, W. W. R. BALL, 241.—National Geographic Magazine: Bathymetric Map, Plate VII: Soaps and Candles, J. CAMERON, 242.

Number 220.

Page.

ART. XXVII.—Contributions to Meteorology; by ELIAS LOOMIS. (Twenty-third paper) 243

XXVIII.—The Sensitive Flame as a means of Research; by W. LECONTE STEVENS 257

XXIX.—The Denver Tertiary Formation; by W. CROSS ... 261

XXX.—Events in North American Cretaceous History illustrated in the Arkansas-Texas Division of the Southwestern Region of the United States; by R. T. HILL 282

XXXI.—A General Method for determining the Secondary Chromatic Aberration for a double Telescope Objective, with a description of a Telescope sensibly free from this defect; by C. S. HASTINGS 291

XXXII.—The distribution of Phosphorus in the Ludington Mine, Iron Mountain, Michigan; by D. H. BROWNE. With Plates VIII–XIII 299

XXXIII.—Palæohatteria *Credner*, and the Proganosauria; by G. BAUR 310

XXXIV.—Appendix: Comparison of the Principal Forms of the Dinosauria of Europe and America; by O. C. MARSH 323

XXXV.—New American Dinosauria; by O. C. MARSH 332

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics.—Presence of a new Metal in Nickel and Cobalt, KRÜSS and SCHMIDT, 313.—Atomic Mass of Tin, BONGARTZ and CLASSEN: Studies from the Laboratory of Physiological Chemistry, R. H. CHITTENDEN, 314.—Divergence of Electromotive force from Thermo-chemical data, E. F. HERROUN: Behavior of Metals to Light, KUNDT, 315.—Hertz's experiments on Electromagnetic Waves, FITZGERALD and F. T. TROUTON: Electrified Steam, HELMHOLTZ: Viscosity of gases at high temperatures and a new Pyrometric method, BARUS, 316.

Geology and Natural History.—Brachiospongidæ; On a Group of Silurian Sponges, C. H. BEECHER, 316.—Waverly Group of Ohio, C. L. HERRICK, 317.—Saccamina Eriana, J W. DAWSON: Ueber eine durch die Häufigkeit Hippuritenartiger Chamiden ausgezeichnete Fauna der oberturonen Kreide von Texas, F. ROEMER, 318.—Shall we teach Geology? A. WINCHELL: The Descending Water-current in Plants and its Physiological Significance, J. WIESNER, 319.—Certain Coloring Matters in Fungi, W. ZOPF: Bacterial Forms found in Normal Stomachs, J. E. ABELOUS, 320.—Mr. Morong's Journey in South America, 321.—Botanic Garden at Buitenzorg, Java, Dr. TREUB: Structure of the "Crown" of the Root, LÉON FLOT, 322.

Obituary.—U. P. JAMES, 322.

Number 221.

Page.

ART. XXXVI.—The Electrical Resistance of Stressed Glass; by CARL BARUS 339

XXXVII.—Formation of Siliceous Sinter by the Vegetation of Thermal Springs; by WALTER HARVEY WEED 351

XXXVIII.—Marine Shells and Fragments of Shells in the Till near Boston; by WARREN UPHAM 359

XXXIX.—A Platiniferous Nickel Ore from Canada; by F. W. CLARKE and CHARLES CATLETT 372

XL.—Stratigraphic Position of the Olenellus Fauna in North America and Europe; by CHAS. D. WALCOTT 374

XLI.—Earthquakes in California; by EDWARD S. HOLDEN. 392

XLII.—Chemical Action between Solids; by WM. HALLOCK 402

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics.—Spectrum of Magnesium, LIVEING and DEWAR: Lecture Experiment for showing Raoult's Molecular depression of the Freezing Point, CIMICIAN, 406.—Chydrazaïne or Protoxide of Ammonia, MAUMENÉ, 407.—New Stannic Acid, SPRING: Ethyl Fluoride, MOISSAN, 408.—Chemical Lecture Notes, P. T. AUSTEN: Elementary Text-Book of Chemistry, W. G. MIXTER: Rays of Electric Force, HERTZ: Rotation of plane of polarization of light by the discharge of a Leyden jar, O. LODGE, 409.—Limit to Interference when Light is radiated from moving Molecules, EBERT, RAYLEIGH: Selective Reflection by Metals, REUBENS, 410.

Geology and Mineralogy.—Recent Discoveries in the Carboniferous Flora and Fauna of Rhode Island, A. S. PACKARD: Annual Report of the Geological Survey of Arkansas for 1888, J. C. BRANNER, 411.—Cretaceous and Tertiary Geology of the Sergipe-Alagôas basin of Brazil, J. C. BRANNER: Tertiary Volcanoes of the Western Isles of Scotland, J. W. JUDD, 412.—Nummulites up the Indus valley at a height of 19,000 feet, T. D. LAFOUCHE: Sand-drift rock-sculpture, R. D. OLDHAM: Catalogue of Fossil Cephalopoda in the British Museum, A. H. FOORD: Nature and Origin of Deposits of Phosphate of Lime, R. A. F. PENROSE, JR., 413.—Fulgurites of Mt. Viso, F. RUTLEY: Scheelite from Idaho, W. P. BLAKE: Hülfstabellen zur mikroskopischen Mineralbestimmung in Gesteinen zusammengestellt von H. ROSENBUSCH: Les Minéraux des Roches par LÉVY and LACROIX, 414.

Botany.—Contributions to American Botany, XVI, SERENO WATSON, 415.—Key to the System of Victorian Plants, F. VON MUELLER, 416.—Revision of North American Umbelliferæ, J. M. COULTER and J. N. ROSE: Flora Italiana, CARUEL: Diagnoses plantarum novarum asiaticarum, C. J. MAXIMOWICZ: Orchids of the Cape Peninsula, H. BOLUS, 417.—Handbook of the Amaryllideæ, J. G. BAKER: Synoptical List of North American Species of Ceanothus, W. TRELEASE and C. C. PARRY, 418.—Multiplication of Bryophyllum calycinum, B. W. BARTON: Enumeratio Plantarum Guatemalensium imprimis a H. DeTuerckheim, J. D. SMITH: Journal of André Michaux: Annals of Botany: Herbarium of the late Rev. Dr. Joseph Blake: Outlines of Lessons in Botany, J. H. NEWELL, 419.

Miscellaneous Scientific Intelligence.—Deep-sea depression in the Pacific near Tongatabu: Dredging Stations in North American Waters, S. SMITH: National Academy of Sciences, 420.—Proceedings of the U. S. National Museum: Examination of Water for sanitary and technical purposes, H. LEFFMAN and W. BEAM, 421.

Obituary.—ANNIE E. LAW: HEINRICH VON DECHEN: GIUSEPPE MENEGHINI: THEODOR KJERULF: JOHN ERICSSON, 422.

Number 222.

Page.

ART. XLIII.—Topographic Development of the Triassic Formation of the Connecticut Valley; by W. M. DAVIS 423

XLIV.—Analyses of three Descloizites from new Localities; by W. F. HILLEBRAND 434

XLV.—New Meteorite from Mexico; by J. E. WHITFIELD 439

XLVI.—Contributions to the Petrography of the Sandwich Islands; by E. S. DANA. With Plate XIV 441

XLVII.—Determination of Water and Carbonic Acid in Natural and Artificial Salts; by T. M. CHATARD 468

XLVIII.—Preliminary Note on the Absorption Spectra of Mixed Liquids; by A. E. BOSTWICK 471

XLIX.—Notes on Metallic Spectra; by C. C. HUTCHINS 474

L.—Allotropic Forms of Silver; by M. CAREY LEA 476

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics.—Composition of Water, RAYLEIGH, 492.—Diamide hydrate and other salts, CURTIUS and JAY: Synthesis of the Glucoses and of Mannite, E. FISCHER and TAFEL, 493.—Geometrical Isomerism, WISLICENUS and HOLZ, 494.—Aluminum acetyl-acetonate, COMBES: Correction of Regnault's results upon the weight of gases, J. M. CRAFTS: Iron spectrum, H. KAYSER and C. RUNGE: Electrical currents arising from deformation, F. BRAUN: Electrical dilatation of quartz, J. and P. CURIE, 495.

Geology and Natural History.—Triassic Plants of Eastern North America, 496.—Geological and Natural History Survey of Minnesota for the year 1887, 497.—Bömmelöen og Karmöen med omgivelser geologisk beskrevne, H. REUSCH, 498.—Composition of a brick from the brick-yard of S. P. Crafts, at Quinnipiac, three miles north of New Haven, Ct, O. H. DRAKE: International Congress of Geologists: Brief notices of some recently described minerals, 499.—Mazapilite, KOENIG: Gahnite, Columbite, GENTH: Stibnite from Canada, G. C. HOFFMANN: Mineralogy of Pennsylvania, J. EYERMAN: Sinter-forming Algæ: Results obtained by etching a sphere of quartz and crystals of quartz with hydrofluoric acid, O. MEYER and S. L. PENFIELD, 501.—Seventh Annual Report of the Directors of the United States Geological Survey, J. W. POWELL: Journal of Morphology: Development of Manicina areolata, H. V. WILSON, 502.—Anatomy of Astrangia Danaë, 503.

Miscellaneous Scientific Intelligence.—International Congress of Electricians: Geological Society of France: Botanical Society of France: American Geological Society, 503.—J. A. Berly's Universal Electrical Directory and Advertiser: Stellar Evolution and its relations to Geologic Time, J. CROLL: Graphics, or the art of Calculation by drawing lines, applied especially to Mechanical Engineering, with Atlas of Diagrams, R. H. SMITH, 504.

Obituary.—FREDERICK A. P. BARNARD.

INDEX TO VOLUME XXXVII, 505.
